Office Action Summary	Application No. 10/561,285	Applicant(s) STERNICKEL ET AL.	
	Examiner George Manuel	Art Unit 3762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 38-74 in the reply filed on 7/20/09 is acknowledged. However, the grounds of traversal are found to be persuasive and the restriction requirement is withdrawn.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-74 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims recite a process or machine. However, the claims considered as a whole represent a particular application of an abstract idea. The claims must be for a practical application of the kernel transform. The claimed invention is not directed to a practical application of a 35 U.S.C. judicial exception because classifying cardiography data does not “transform” an article or physical object to a different state or thing; or otherwise produce a useful, concrete and tangible result. See MPEP 2106.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

Art Unit: 3762

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-8, 10, 13, 24-28, 32, 33, 35, 38-45, 47, 50, 61-65, 69 and 70 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jeanguillaume (U.S. 6,342,699).

Jeanguillaume discloses using Fourier transform kernels in Fig. 9. Fig. 15 shows acquiring cardiographic data using electromagnetic heart activity comprising tomographic imaging acquisition.
